## PATIENT

Name: PATIENT TESTNAME  
 Date of Birth: 2018-02-23  
 Gender: Male  
 Age: 1  
 Height: 3'1" Weight: 31.0 lbs  
 Telephone #: 1-866-364-0963  
 Street Address: 1021 HOWARD AVENUE SUITE B  
 City: SAN CARLOS  
 State: CA Zip #: 94070  
 Email: fdu@vibrantsci.com  
 Fasting: FASTING No. of hours: 12.0  
 EMR #: V1609100001  
 Unique Patient #: A123456789

## PROVIDER

Practice Name: Demo Client, MD  
**Provider Name: Demo Client, MD (999994)**  
 Street Address: 1234 TEST AVENUE  
 City: TEST  
 State: CA  
 Zip #: 12345  
 Telephone #: 1-800-842-7268  
 Fax #:

For doctor's reference

**Vibrant Wellness** is pleased to present to you, Food Sensitivity Testing, to help you make healthy lifestyle and dietary choices in consultation with your physicians and dietitians. It is intended to be used as a tool to encourage a general state of health and well-being.

**Vibrant Food Sensitivity (Profile 2)** is an array of 84 commonly consumed food antigens which offers very specific antibody-to-antigen recognition. The panel is designed to assess an individual's IgG and IgA sensitivity to food antigens.

**Interpretation of Report:** The test results of antibody levels to the individual proteins are calculated by comparing the average intensity of the individual protein antibody to that of a healthy reference population. Reference ranges have been established using 192 healthy individuals. The results are displayed as Positive, Moderate or Negative. A Positive result indicates that you have an increased IgG/IgA reaction to the food antigen with respect to the reference range. A Moderate result indicates that you have a moderate IgG/IgA reaction to the food antigen with respect to the reference range. A Negative result indicates that you have a low IgG/IgA reaction to the food antigen with respect to the reference range. Vibrant utilizes proprietary reporter based analysis which is designed to assay specific total IgG (subclasses 1, 2, 3, 4), and total IgA (subclasses 1, 2) antibodies. The classification of Positive to Moderate to Negative denotes the level of IgG and/or IgA antibodies detected.

The Vibrant Wellness platform provides tools for you to track and analyze your general wellness profile. Testing for Food Sensitivity offered by Vibrant Wellness is performed by Vibrant America LLC, a CLIA certified lab CLIA#:05D2078809. Vibrant Wellness provides and makes available this report and any related services pursuant to the Terms of Use Agreement (the "Terms") on its website at [www.vibrant-wellness.com](http://www.vibrant-wellness.com). By accessing, browsing or otherwise using the report or website or any services, you acknowledge that you have read, understood, and agree to be bound by these terms. If you do not agree to accept these terms, you shall not access, browse or use the report or website. The statements in this report have not been evaluated by the Food and Drug Administration and are only meant to be lifestyle choices for potential risk mitigation. Please consult your Physician/Dietitian for medication, treatment or life style management. This product is not intended to diagnose, treat, or cure any disease.

**Please Note - It is important that you discuss any modifications to your diet, exercise and nutritional supplementation with your physician before making any changes. To schedule an appointment with Vibrant Clinical Dietitians please call: Toll-Free 866-364-0963.**

 **VEGAN**

The values in parentheses represent previous values tested for this Food antigen.  
 ↑: Increased sensitivity compared to previous; ↓: decreased sensitivity compared to previous; ↔: Same as previous.

## RISK AND LIMITATIONS

This test has been developed and its performance characteristics determined by Vibrant America LLC., a CLIA certified lab. These assays have not been cleared or approved by the U.S. Food and Drug Administration.

Quantification of specific IgG and IgA antibodies is not an FDA- recognized diagnostic indicator of allergy.

Food Sensitivity testing is performed at Vibrant America, a CLIA certified laboratory, and utilizes ISO-13485 developed technology. Vibrant America has effective procedures in place to protect against technical and operational problems. However, such problems may still occur. Examples include failure to obtain the result for a specific antigen due to circumstances beyond Vibrant's control. Vibrant may re-test a sample in order to obtain these results but upon re-testing the results may still not be obtained. As with all medical laboratory testing, there is a small chance that the laboratory could report incorrect results. A tested individual may wish to pursue further testing to verify any results.

The information in this report is intended for educational purposes only. While every attempt has been made to provide current and accurate information, neither the author nor the publisher can be held accountable for any errors or omissions.

Vibrant Wellness makes no claims as to the diagnostic or therapeutic use of its tests or other informational materials. Vibrant Wellness reports and other information do not constitute medical advice and are not a substitute for professional medical advice. Please consult your healthcare practitioner for questions regarding test results, or before beginning any course of supplementation or dietary changes.
